Watering display beds can be very time consuming and expensive in terms of labour costs. A sprinkler system will ensure even watering with gentle rain like droplets; and using automatic controls, the irrigation can be completed before the first customer arrives. Health and Safety dangers of trailing hoses are also reduced.

- Black 16mm polypipe
- Barbed fittings
- Easy clean sprinkler assembly
- Even distribution
- Spaced every 2.0 - 2.5m
- Complete kits available
