Electrical connection via pre-fitted lead

Inlet connection 1/2" BSPM / Outlet connection 1" BSPF or 3/4" BSPM

Designed for situations where on-site pressure is too low, or where Water Regulations demand Category 5 water protection. Pre-assembled pressurisation unit enabling easy installation and minimum on site work. The unit is pre-wired and tested at manufacture ensuring on site commissioning time is greatly reduced.

Head	Flow (m <sup>3</sup> /hr)
20m	4.2
30m	3.0
40m	1.4

- Automatic submersible pump
- Dry run protection
- Compact footprint
- 91 litre capacity water storage tank
- Provides up to 4.8 bar pressure
- Water Regulations compliant for Cat 5 water usage
- Pressurised output with fully automatic operation
- Dimensions: 690mm x 370mm x 830mm high

**Compact pump & tank unit**
