Heron Ma-6 controller

Description

Exclusive to Access Irrigation, the Heron Ma-6 is a simpler, more user friendly version of Heron's dependable Mi range.

The controller has a large back lit digital display for easy programming and a very high level of reliability.

The unit features a pump freeze facility, which in conjunction with a float switch, will hold the program in the event of a failure in the water supply.

The controller features a permanent memory so programs are never lost due to power failures.
