

2020-21 Catalogue

The History of Access Irrigation

Access was started in 1958 by Mr Graham Pearce, an industrial chemist who had traded chemistry for the 'good life' running a small market garden in Crick, Northamptonshire. To try and get a better price for his strawberries, he designed an innovative glass and steel cold frame with sliding glass sides for easy access – hence our name Access.

Original drip nozzle

The sandy soil at Crick caused low strawberry yields and it was decided to concentrate instead on selling the cold frame. Before the invention of the polytunnel, cold frames were a low cost way of growing under glass. As nurseries

and growers began to take up the cold frames with enthusiasm, attention was turned to providing irrigation inside the frames. Unhappy with the nozzles already available, Mr Pearce used his scientific background to design his own.

The invention of the polythene tunnel caused the company to refocus. Cold frames were then targeted at the keen gardener and the irrigation division was formed

to supply growers with irrigation - still in its infancy in the UK.

From its horticultural roots, the irrigation division of Access focuses on 3 main areas: horticulture, landscape and more recently green systems including rainwater recycling and green roofs. All systems are designed to the same exacting standards of efficiency and durability as our horticultural irrigation systems.

In 2001 the company launched its highly respected components catalogue, coupling professional quality components with helpful tips and advice.

Original cold frames at Crick

Our premises on the original site

Green roof system

The Access philosophy, instilled by Mr Pearce in the 1960's, has always been to provide innovative products coupled with good customer service. From advice to supply, Access are able to offer a fast, friendly service backed up by our own specialist design function and dedicated warehouse.

We are here to help.

Welcome to our 2020/21 catalogue

Welcome to our latest catalogue, filled with professional quality irrigation components.

Order ONLINE

Our new website allows you to browse and purchase our entire product range quickly and easily. You can also download relevant PDF information sheets. Items with this logo have bulk pricing online.

FREE Economy Delivery

For not so urgent orders we can offer a FREE delivery service on orders over £100 in value*.

STANDARD Delivery

We deliver fast, as standard, using fully traceable carriers. For landscapers we can even deliver direct to the clients address, allowing work to start as soon as the goods arrive.

NEXT DAY Delivery

For really urgent orders, we also offer a next day service for items in stock. If necessary, items can be put on an AM delivery*.

COMPETITIVE Pricing

Access offer quality irrigation components at competitive prices, so you can always be sure of a good deal – and all backed up by our friendly and knowledgeable sales team!

We look forward to assisting you.

Liquid **Feeding**

A pressure regulator must be fitted to all systems capable of delivering above the rated pressure. For fertilisers Water Regulations require a double check valve (see p45) in domestic situations or a pump and tank set for commercial use to prevent back-contamination.

Static Dilutors

Fill the Static Dilutor bottle with liquid feed, select the appropriate jet and connect to the water supply.

As water passes through the dilutor head it draws up a ratio of liquid feed which mixes with the water.

Designed to be filled, put near the tap, and then not moved until it is emptied. Max operating pressure 2.5 bar.

Price £	Code	Jets	Connector	Flow Rate		Capacity				
FIIGE	Code	Supplied	Туре	max	min	оарасну				
		10:1	Brass							
64.00	ADS (normal flow)	25:1	quick connector	2.3m³/h 500 gph						9.0L
04.00		50:1								2 gal
		100:1	& 'Geka'							
		50:1	1.1m³/h 6.8m³/h 'Geka' 250 gph 1500 gph							
69.00	ADSH (high flow)	100:1		9.0L 2 gal						
	(iligii ilow)	200:1		тооо урп	Loc gpii	z yai				

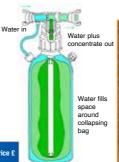

Mobile Dilutor

The Mobile Dilutor gives extra versatility. The liquid feed is kept inside an inner bag. This has a number of advantages, the unit need only be part filled, it can be moved from tap to tap without disturbing the final dilution rate and it can be left part-filled overnight.

A wider range of chemicals including those of a similar density to water can be used.

Two models are available - the high pressure bottle will withstand 4.0 bar pressure and is manufactured from heavy duty polythene.

Pressure	Flow Rate Jets		Code	Price £	
Fiessule	min	max	Supplied	Gode	FIICE Z

SuperDOS

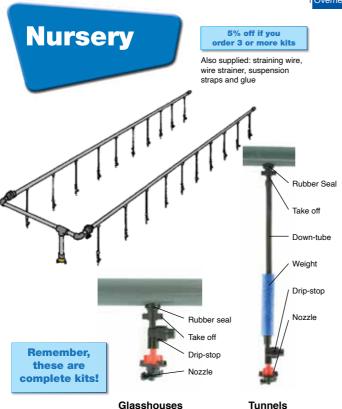

The SuperDos is the workhorse of the range, handling flows between 34–6800 l/h (A30) or 34–8000 l/h (A45) and **designed for constant use** in industrial or large nurseries.

Proportional chemical injectors are **powered by the flow** and pressure in the water supply, eliminating the need for electrical power. As the flow of water increases, so does the amount of chemical added – ensuring the right amount of chemical or fertiliser is added every time.

The chemical injection ratio can **easily be adjusted** using the ratio guide etched on the base of the unit.

Operating Pressure: 0.34 - 6.9 Bar

Model No	Litres / hour	%	Ratio	Fittings	Code	Price £
Minidos	7 - 2,700	0.5 - 2.5	200:1 - 40:1	34" M	EIDAMD	349.00

A45-2.5	34 - 10,200	0.5 - 2.5	500:1 - 40:1	1½" M	EIDA45	499.00

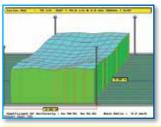

The Access Mini-spin nozzle gives a very even level of distribution.

The bridge-less design has a rotating anvil which shatters the water into evenly spread particles. In comparison, the tiniest blemish or build up of lime on a fixed anvil nozzle gives permanently uneven distribution.

The nozzle fits at the end of a flexible dropper tube. In low tunnels the pipe lines can be above head height, yet allow the nozzle to remain at a height to ensure the best distribution pattern without "bounce back". Drip-stop valves are fitted to each nozzle. **Glue included.**

All designs give high uniformity

When ordering – quote code and length required, e.g. KV3–10

Multi-span Houses Lines can be linked together to a header pipe, with valves or solenoid valves to each line. Contact our sales team.

Supplied with 2.5m lengths of pre-drilled and socketed uPVC pipe, Access Mini-spin nozzles, drip-stop valves, downtubes (tunnels only). Entry filter and 'Geka' hose fitting. Twin lines (3.0m/4.2m/4.5m widths are single line) include linkage pipework and on/off valves to each line. Fixings supplied: Wire strainers, straining wire and suspension straps (single line in tunnel has suspension straps to fix to ridge)

For 'Geka' hose tails see p15; Blanking plugs or shut off valves to blank off nozzles see p38

CNL Drippers

These 'state-of-the-art' drippers are designed for crops such as Strawberries where extremely high uniformity is required. The pressure compensated drippers also have a non-leakage device which 'locks' the dripper at the end of the cycle, preventing water drainage at the end of the cycle and the need to refill at the start of the next cycle.

Netafim PCJ CNL Drippers

- Labyrinth design with maximum filtration area
- · Continuously self cleaning dripper
- · Silicon injection moulded diaphragm

Drippers are available in two operating pressures, with the HCNL having a higher shut off pressure, making them better suited to sloping sites.

Available as dripper only, or with 50cm or 80cm lead and Prevo 'S' stake.

LCNL operating pressure: 0.7 - 4.0 bar HCNL operating pressure: 1.5 - 4.0 bar

Single dripper

Dripper with 80cm lead

Dripper with Shut Off

Ideal where individual drippers need to be shut off. The dripper can either rest on the compost, or can be staked. Pressure Compensated CNL nozzle. Pre-assembled 2 l/h dripper, lead, nipple, cap.

Ottima

Adjustable, non-compensated dripper – ideal for larger pots and planters. Stake model has double barb to allow connection into a 16mm or 20mm supply pipe. Barbed version can be directly mounted on a pipe. Unscrew the cap one click at a time to adjust the flow. Adjustable between 0 and 40 l/h.

Simple pin type dripper is not as sophisticated as modern pressure compensated drippers and are more liable to blocking.

Requires 3mm punch – see p5; for connecting pipe use P13-20m – see p27.

T-tape for Glasshouses

Designed for row crops in glasshouses, each dripper is just 20cm apart.

- · Advanced design suited to glasshouse watering
- · Use in flower crops, vegetable and capillary beds
- Economical with water
- · Allows easy feeding
- · Dry (disease free) foliage
- · Low labour costs

Polyphosphate Descaler

- · Simple Cartridge based system
- · Mounting bracket and spanner included
- Easy Installation

How it Works

In 'hard water' areas Calcium precipitates out of the water supply causing scale build up on pipe walls, dripper outlets and plant leaves. Traditionally Nitric acid dosing is used to sequester the calcium, requiring large quantities of acid.

The polyphosphate descaler uses small quantities of long chain polyphosphates (derived from phosphoric acid) to act as a 'crystal modifier'. By modifying the crystalline structure these compounds will not precipitate into scale and actually stay in solution. Over time already deposited mineral scale deposits will also dissolve.

Aquaflex Hose

An outstanding all-terrain UV stabilised multilayer hose that delivers **exceptional durability**, flexibility and water flow performance.

Manufactured in the UK using specially formulated materials, Aquaflex offers **excellent anti-kink properties** and resistance to repeated bending and is the ideal choice for watering and irrigation purposes.

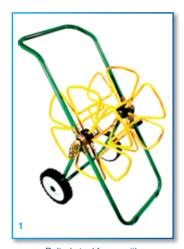

The exclusive braiding reinforcement technique helps to provide **superior burst resistance** and working pressures that exceed those of similar products in the professional hose market.

Here is a "snap on" ("snap off" system. We use tough brass quick release connectors, much tougher than domestic plastic fittings – and are fully compatible. It is easy to connect together and there are no "horrid" hose clips!

Irrigation is vital if plants are to establish quickly, especially when conditions are warm and dry. Irrigation also ensures newly planted specimens have a far better chance of survival, and that plants and lawns in high traffic areas are able to recover.

As well as the components and kits available in this section. Access produce a companion catalogue - the 'Landscape Pocket Guide' which includes sample irrigation designs for small to medium sized landscape projects.

For larger projects. Access also have an experienced design department.

Border Watering Kit

Keep precious plants watered even in hot, dry spells with this border sprinkler kit.

The system consists of a black pipe running the length of the border, with spiked risers fitted as required.

Each riser has a choice of nozzle to suit the border width. Branching tees and elbows are included. Connect to an outdoor tap or a garden hose. Simple to install. Needs punch, see p5.

- - 10 medium sprinklers

What you get:

10 half-circle nozzles

Covers up to 75m² (25m x 3m wide)

Nozzle	KES040	KES070	KEASH40
Bed width	2.0m	3.0m	1.0m
Sprinkler Spacing	2.0m	2.5m	1.8m

Small Border Watering Kit

For smaller gardens this kit will water an entire border with water efficient sprinklers.

The system consists of a black pipe running the length of the border with spiked risers fitted every 2m.

Branching tees and elbows are included. Connect to an outdoor tap or garden hose. Simple to install. Needs punch, see p5.

What you get:

- · 10 sprinkler risers · 25m pipe (16mm)
- · Tap connector
- · Fittings
- · Medium Sprinklers (KES040)

Covers up to 40m² (20m x 2m wide)

Code	Price £
SBW25	54.00

Lawn Watering Kit

Covers up to 250m² (25m x 10m wide)

Nothing looks better than a well watered lawn, and this pop-up sprinkler kit makes installation very easy.

3 pop-ups are included, each one can have its radius adjusted between 4.9m and 9.1m, and its arc adjusted between 40° and 360°. 25m of pipe and all fittings are included, as is a tap connector.

What you get:

- 25m pipe (20mm)
- Tap connector
- Fittings
- · Fittings
- 3 pop-up sprinklers with interchangeable nozzles

 Code
 Price £

 SLW3
 89.00

Note: Water Regulations require pop-up sprinklers in commercial premises to be protected by a break tank. For home gardens, check with your water supplier.

Temporary Lawn Watering Kit

Laid a new lawn?

Use this system to help it establish. Add an automatic controller for fully automatic operation.

Includes 3 risers, each with a sprinkler that covers 10m diameter, 25m of hose and all fittings required.

Code	Price £
STLW	245.00

Covers up to 250m² (25m x 10m wide)

What you get:

- 3 risers and sprinklers
- · 25m ¾" hose
- · Fittings
- · Tap connector

Underground Valve Boxes

For a neater installation. hide all of the control valves underground.

	Battery	Price £	Mains	Price £
2 zone	EPAV02	145.00	EPAB02	112.00
4 zone	EPAV04	229.00	EPAB04	164.00
DB option	EPAVDB	199.00	EPABDB	167.00

3 Simple Steps

1 Select Valve Chambers

Choose one or more valve boxes to bring water to the various areas of the garden. If you are having a battery powered controller, choose a battery valve box.

2 Choose Controller

Choose mains or battery powered controller to suit vour needs.

3 Select Cable

If the controller is remote from the valve box, measure how much cable is needed to run from the controller location to the valve boxes.

Controller not included - see pages 28-29

Tap Link Kit for Valve Boxes

The STK20 kit is designed to connect onto a single valve box.

The STK25S kit will connect two valve boxes and also includes a length of low voltage cable, allowing the valve box to be controlled by a wall mounted controller such as the Hunter X2.

Tap and backplate are not included.

Pipe Size	Code	Price £
20mm x 25m	STK20	59.00
25mm x 25m	STK25S	139.00

Tap Manifold

A simple way of fitting manifolds to the tap, kits will suit battery operated controllers or mains powered controllers. Includes valves and link pipe but not tap or controller. DB valve option provides compliance with the Water Regulations for dripline in house gardens.

Inlet: ¾" F Outlet: 3/4"M or 1"F

Controller not included - see pages 28-29

Controller Type	Zones	Code	Price £
	2 zone	EPAG02	107.00

	2 zone	EPAT02	79.00
Mains	4 zone	EPAT04	124.00
	DB Valve	EPATDB	132.00

Permadrip Pro

Easy Installation

At last – a really simple dripper system

- · The most efficient way to water
- · Anti-siphon design resists clogging
- Brown to blend in
- · Pressure compensated ideal for long runs
- · Thick walled for durability

Lay and peg

Connect up

Connect to tap

For Barbed Fittings see p41

Your Questions Answered

How far apart do I space Permadrip?

Space runs 0.6m apart. Use the 0.3m spacing Permadrip for providing extra water around trees. Bending radius, 18cm.

How much do I need?

Work out the area of the beds (in m2) and double. This is how many metres of 0.5m spaced Permadrip you need.

How much can I use?

It depends on your water supply. Measure your supply in I/hr (see p37). Divide this by 3.2 for 0.5m spacing (5.3 for 0.3m spacing) this is how many metres you can run at a time.

What about Water Regulations?

For house gardens you can run Permadrip on the surface if you add a DB valve. See p27.

How long should I run it for?

Approximately 30 mins per day in dry weather or one hour three times a week.

Operating range: 0.8-3.5 bar Nozzle Output: 1.6 l/h Maximum length (0.5m): 165m Recommended Filter: 0.13mm

Border Drip Kit

Covers up to 60m²

	Covers	Code	Price £
Small	15m²	SPBK25	39.00
Large	60m ²	SPBK	114.00

What you get:				
Small	Large			
25m	100m	Drip Line		
25	100	Anchorage pegs		
1	1	Barbed fittings pack		
1	1	Inlet filter		
1	1	Hose connector		
1	1	Tap connector		

Drip irrigation is the most efficient and unobtrusive way of watering beds, with water dripping directly into the soil. The drip line is brown to make it as unobtrusive as possible, although it can be covered with a mulch to make it invisible.

The Permadrip drip line is made from a thick walled polythene pipe with commercial grade pressure compensated drippers spaced every 0.5m for even coverage. Simple to install.

The kit can either be connected directly to an outdoor tap, or can be connected to a hose with a standard quick connector. Requires DB valve (p27) to comply with domestic water regulations.

Dripline Starter Pack

Allows dripline to be easily connected to an outside tap or to a hose using a snap connector. For beds supplied using underground pipe, the threaded fitting can be connected to a compression fitting.

The kit also includes a foldover stop end connector to cap off the far end of the pipe, and a straight connector in case plain pipe (see p40) is being used to connect from the tap to the border.

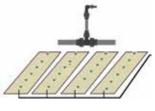

Code	Price £
FBSP16	5.50

Border Link Kit

The Border Link Kit allows up to 4 separate beds to linked back to either a valve box or an outside tap using underground pipe. The kit can supply water to either border drip

kits or border sprinkler kits. By linking the beds together underground the irrigation system becomes much less obtrusive and is easier to automate.

The kit consists of 25m of underground supply pipe, 4 take off points (one for each bed) and connections for either a standard garden tap or to an underground valve box.

Code	Price £
SLK4	54.00

Air/Vacuum Relief Valve

Required for all Permadrip installed underground.

Fit to the highest point of each dripline to prevent dirt entering the drippers.

Code	Price £
TNARVT	10.00

Anchorage Pegs

Fit every 0.5 - 1.0m to hold the drip line down. Fits 16/20mm.

Sturdy barbed pegs for more grip

Rotator Sprinklers

- Matched Precipitation
- · NEW side strip
- · Water efficient

	Code	Price £
4" Pop up only	KHPPR	2.20
Box of 10 sprinklers	KHPPRBX	18.00
4" Pro body (2.8 bar regulated)	КНРРН	9.20
Day of 10 apriphlars	VUDDUDV	70.00

Water efficient sprinklers with 'matched precipitation' which allows different nozzles and arcs to be used on the same zone while maintaining uniformity. If there is sufficient flow and pressure, in 'home gardens' the sprinklers can be connected using a 'DB' valve (page 27).

The new 'Pro' body has a heavy duty spring, a check valve and 5 year warranty. The sprinkler is regulated to 2.8 bar pressure.

Hunter MP Rotator Nozzles

The original MP Rotator nozzle, manufactured by one of the leading sprinkler manufacturers in the world, this range offers unrivalled options in terms of arc and radius adjustment.

All stated radii can be reduced by up to 25% using the nozzle key.

Hanging Basket System

Ever wanted to water a garden, but thought it was too complicated?

Access have designed a new range of kits which include all the parts you need to set up the system. Automatic controllers can be added to irrigate whilst on holiday, and several systems can easily be run from a standard ½" tap.

Easy Installation

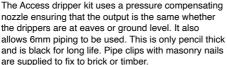

Clip to wall

The ideal way to water baskets and tubs

- Easy to install
- Unobtrusive pipework
- · Top quality nozzles for reliability
- Can be automatic

Hanging baskets and planters enhance any property, but are a nightmare to water. Now, with this easy to install system, everything can be watered with the turn of a tap.

Cut to length

Fit lead and stake

Saves hours of time!

Waters up to 25 baskets

Maximum Number of Drippers*

DB Valve and Kit

Water regulations require a DB valve to be fitted 300mm above the highest dripper. The fixing kit gives the parts required to fit the valve into the small bore pipe at high level.

Inlet: 3/4"F Outlet: 3/4"M

	Code	Price £
DB Valve	EVDB3	104.00
Fixing Kit	EVDB3KT	2.50

Hanging Basket Feeder

Feeding baskets has always been a problem. especially as the small compost volumes of a basket and the regular watering required conspire to rob the plants of the nutrients they need.

The feeder is connected to the irrigation pipework. Inside is a slow release fertiliser which feeds every time you water. Two cartridges should last a season and the first cartridge should be replaced after 2 months.

Flow range:	1 – 200 l/h
Max pressure:	4.0 bar (58 psi)
Fishing condition	Connector for 3.5-4.0 mm ID pipe
Fittings supplied:	Brass quick connectors

	Code	Price £
Hanging Basket Feeder	AFBP	54.00
Replacement Cartridge	AFBP-C	16.00

Brass quick connector

Small bore connector

Battery Controllers

Battery operated controllers are becoming increasingly sophisticated and reliable, and allow automatic control anywhere – making them ideal for remote locations. We carefully select controllers, ensuring they will endure the damp – vital in Britain! Batteries will last a whole season. Always protect controllers from frost.

Galconette - Single Station

A simple, reliable tap timer with large display and plenty of features.

Manual over-ride with auto off function.

Genyo Auto-start Unit

Converts pumps so that they start automatically when a pressure drop is detected, such as when a tap is opened or an irrigation valve operates.

- · IP65 rated body
- · 1" BSPM inlet and outlet
- Operates pumps up to 16 amps
- · Max 10 bar pressure
- · Pressure Gauge included

Union fitting

Allows the Genyo unit to always face forward and to be removed from the pump without unwiring the entire unit.

Vertical Pumps

These vertical pumps are ideal for larger flows. For more 'mission critical' applications we also sell the Lowara range of pumps which boast a network of service engineers for fast breakdown assistance.

Isolator Switch FLC Amps Code + Price £ 1PH Heavy Duty Starter 16 ESB1HD 306.00 329.00 3PH Heavy Duty Starter 16 ESB3HD

Heavy Duty Starters include a thermal overload for enhanced pump protection. Specify pump Full Load Current (FLC) when ordering heavy duty starters so that the correct thermal overload can be fitted.

25

Above ground tanks

240v transformer, float switch and 1" solenoid to fit into mains supply pipe to tank ball valve.

Below ground tanks

240v transformer and 2 float switches (one for alarm), air gap compliance kit, overflow alarm & 1" solenoid valve to connect to mains water supply.

Auto-start Submersible

DAB1200X

Auto-start copes with 'water-out' situations

ESBI

Designed to cope with 'water out' situations, the pump will automatically stop if the water supply runs out, then periodically try to restart until the water supply returns. Built-in non-return valve. DAB1200X requires buffer vessel to protect the pump. DAB55X is a variable speed pump so will cope with high and low water flows

Designed to boost the pressure of the water supply

- · Complies with the Water Regulations
- · Simple to Install

These units are designed for systems where pressure is a problem or compliance with the Water Regulations is required. The units are pre-assembled and simply need to be connected to a power and mains water supply.

Cat 5 Pump and Tank Units

Various pump options available. For stop/start applications such as mist propagation a 20L pressure vessel model is also available. The flow from the unit must be less than or equal to the flow into the tank.

Tank With Type 'AB' Air Gap

190l tank

Type 'A' air gap tank

The Water Supply (Water Fittings) Regulations 1999 stipulate that non domestic irrigation systems must be isolated from the public water mains by means of a 'Type AB' air gap.

These tanks have the option of a supplementary 'Type AB' air gap tank, which fits on top of the existing tank. This supplementary tank provides compliance with the law, without the need to cut overflow weirs into the sides of the tank.

Capacity	W x D x H mm inc. lid	Code ~	Price £
190L / 42 Gal	1020 x 500 x 550	EWTPK190	187.00
Air Gan Tank	375 x 245 x 230	FWTPTA	122.00

Main Tank also

- includes:
 1/2" Ball valve and float
- (max flow 1,200l/h)
 Angled service valve to accept 15mm copper pipe
- Hatch
- · Insulation

Air Gap Tank also includes:

- · Extended ball valve arm
- · Fixing screws and seal
- · Insulation

Polythene Tanks

- · UV stabilised polythene · Access hatch
- · Threaded outlets

Introduction

We only choose good quality fittings to put in our catalogue – we are often surprised at the poor quality parts that are around. To make life less complicated we tend to stock all the popular sizes – if you have a large requirement for something unusual please give us a call.

Stuck without a ruler? Use a coin!

5p = 17mm diameter 10p = 24mm diameter 2p = 26mm diameter £1 = 22mm diameter

Identification Tables

Thread Sizes

The O.D. of the thread and its size are different. For example a $\frac{1}{2}$ " thread has an O.D. of approx $\frac{3}{4}$ ".

BSP Thread	1/4"	3/8"	1/2"	3/4"	1"	11/4"	1½"	2"
Male thread OD mm	13	17	21	26.5	33.6	42	48	60
Female thread ID mm	11.5	15	18.6	24	30	38.5	45	57

Imperial Pipe

Like thread sizes, the O.D. and the pipe size are different. Wall thicknesses are denoted by its class. Black polythene pipe was generally class B, C or D. Rigid grey uPVC pipe was class C, D, E or T. We can supply adaptor fittings please ask our sales department.

Pipe Size	3/8"	1/2"	3/4"	1"	1¼"	1½"	2"
OD mm	17.2	21.4	26.5	33.6	42.2	48.3	60.3

Metric Pipe

The pipe is measured by the O.D. Below 12mm diameter there are no standard sizes - so beware when matching small bore pipe.

Pipe OD mm	12	16	20	25	32	40	50	63
Blue MDPE water pipe (12 bar)			1	1	1		1	1
Black MDPE water pipe (10/12 bar)			1	1	1	1	1	1
Black LD/MDPE pipe (4/6 bar)	1	1	1	1	1	1	1	1
Grey uPVC pipe (5-16 bar)		1	1	1	1	1	1	1

Copper Pipe

Available in O.D. sizes 15, 22, 28, 35, 42 mm.

If you can't easily work out the OD of a pipe, wrap a strip of paper round and mark where it overlaps. This will then give circumference of pipe. Divide by pi (3.1428) to give pipe diameter.

Want to know your water flow?

Take a container of a known volume (e.g. 101) and time how many seconds it takes to fill with the tap 3/4 open (e.g. 20 seconds). Divide the volume by the time then multiply by 3600. e.g. $\frac{10}{200}$ x 3600 = 1,800 [/h ightharpoonup

Eindor Taper Fittings

We have been using these fittings for many years — the push fit design has been tested to 6 bar!

Pre-packed in resealable, labelled bags. Easy to open, easy to identify. We try to be helpful!

12mm Connector

For 12mm OD poly. Bottom end fits 6mm F fittings eg KEP.

Polythene pipe has a number of advantages over uPVC pipe (p46). It is less susceptible to frost damage, does not need solvents to join it and is more resistant to stone damage underground.

Choose pipe with a lower pressure rating for above ground work as it is more flexible. Choose 10 bar rated pipe for underground use where it is more difficult to spot leaks.

Underground Supply Pipe

- · 10 bar black MDPE pipe
- · Thick wall for durability
- · High pressure rating
- Use compression fittings

Blue water pipe must only be used for potable underground mains water supplies, such as cold water feeds to storage tanks. It must not be used for irrigation water. Black pipe with a green stripe is available for recycled water systems.

Installer Approved! Not only are these fittings WRC approved - our installers think they are the best thing around - and they have tried them all!

PoziLock Fittings

- · Positive sealing
- · Increased pressure resistance

Barbed fittings are a low cost way of connecting low pressure polythene pipe. However, their design means that, occasionally, they may drip. This does not matter on a border but, when clipped to a wall, it can look unsightly. Jubilee clips look a mess and can damage the fitting – making the situation even worse – and high pressure compression fittings are very bulky.

Access have introduced a neat and economical solution – a low pressure compression fitting. With a slim design, these fittings fit into the pipe quickly and neatly and can be easily remade if necessary.

Much easier to fit than barbed fittings - no need for hot water.

Travelling Sprinklers

Small Traveller

Designed for gardens and light commercial use, the sprinkler follows the path laid out by the hose. The shut-off ramp turns the sprinkler off.

Diameter: 4.6m - 13.7m @ 4 bar

Use 1/2" hose.

Code	Price £
EHTS2	131.00

Large Traveller

Designed for sports grounds and large turf areas, the unit pulls itself along a steel cable, shutting off automatically at the end of the run.

Diameter: 34m - 38m @ 3 - 7 bar Use 1" hose.135m steel cable waters 183m long run. 1" BSPM inlet.

Code ~	Price £
EHTS4	1180.00

Reel Irrigators

Reel irrigators are designed to water large grass surfaces such as playing fields or football or rugby pitches. Smaller irrigators can be operated from a good mains water supply, larger units will require a water storage tank and pump to provide enough pressure.

Reel irrigators incorporate a drum of hose which is unwound manually. Once the irrigator is operating, the hose will automatically be pulled along the grass until it returns to the unit.

Speedy Rain 32/90

Hose diameter x length: 32mm x 90m Output range: 1.68 - 3.60 m³/hr Connection pressure: 3.5 - 5.0 bar

Wetted width: 26 - 37m

Rewind speed: 10 - 30 meters / hour

Code ~	Price £
EUDIOO	2770.00

Speedy Rain 40/130

Hose diameter x length: 40mm x 130m Output range: 2.94 - 7.44 m³/hr Connection pressure: 4.4 - 8.0 bar

Wetted width: 26 - 44m

Rewind speed: 10 - 40 meters / hour

Code ~	Price £
EHRI40	5250.00

Sports Pitch Strip Sprinkler Package

A low cost method of watering a complete football or Rugby pitch in 10 days using a standard water supply.

Two options are available, for grounds where the pressure and flow are good the system can be run directly from the mains water supply; for faster watering or for poorer supplies a pumped system is available.

The package consists of temporary sprinklers run across the width of the pitch.

The pumped system also includes an underground pipe to run down one side line with 5 take-off points.

	Code ~	Price £
Mains	STPW6	2145.00
Pumped	STPW-P	4595.00

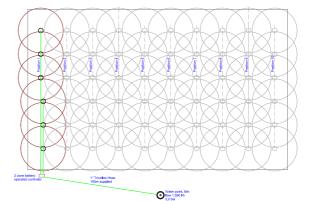

What you get (mains)

- · 6 sprinkler sleds to cover pitch width
- · Connecting hose and 2 hose reel carriers
- · 2-zone battery controller to water 3 sprinklers at a time

What you get (pumped)

- · 7 sprinkler sleds to cover pitch width
- · Connecting hose and hose reel carrier
- · 5 take-off points and 150m underground pipe

High Flow Take-off Points

Watering points for large flow systems such as Sports Fields and Golf Courses.

- Solid Brass Construction
- · Designed to fit into underground chambers

Order Information

Terms and Conditions

These Terms of Business are in addition to our Terms and Conditions of Sale. All orders placed with Access are subject to our Terms and Conditions of Sale unless agreed in writing by a director of Access Irrigation Ltd. A full copy of the Terms and Conditions of Sale is available on request.

Placing your Order

Please indicate the quantities, reference code and description on all orders. Please also include a contact phone number.

Phone: 01788 823811

We are open Monday - Friday 8.30am - 5.30pm or leave a message outside office hours.

Fax: 01788 824256

Email: sales@access-irrigation.co.uk

A convenient way to order, 24 hours a day.

Online: www.access-irrigation.co.uk
All components are listed online for fast and easy ordering.

Collection

For a speedy service, phone your order through beforehand.

Payment Terms

New Customers

We require payment with order.

Existing Customers

Existing customers may open a credit account - details are available on request.

We accept payment by

Cheque, or the following credit and debit cards.

Damaged Goods

Any goods delivered damaged must be signed for as damaged and notified to us in writing, within 5 days; otherwise no claims can be accepted.

E&OE: Access reserve the right to change products and prices at any time. No part of this Catalogue may be reproduced by any method without prior permission from Access Irrigation Ltd.

FREE Economy Delivery

Catalogue orders over £100 (ex VAT) will be despatched by post or carrier free of charge if paid by credit / debit card.

This service will normally take 3 – 5 working days longer than the Standard service. The order will generally be held until all items are ready for despatch.

Direct despatch (~) items and bulky/high value items are excluded.

STANDARD Delivery

Our standard service ensures that orders are normally despatched within 48 hours (over 85% are despatched in 24 hours). Items are despatched using fully traceable 24hr carriers.

Delivery charges for orders paid for by credit/debit card:

£0 - £199 £10.95 £200 + £19.95

For a faster service, orders will be part despatched if any items are out of stock.

Direct despatch (~) or special order (+) items may take longer. Bulky items may attract a surcharge.

NEXT DAY Delivery

For really urgent orders, we can arrange for a next day delivery service for items in stock. Please ring through your order to check the stock situation. A delivery surcharge will apply.

Other Terms

Deliveries to remote areas (eg. Scottish highlands), Northern Ireland, Eire and non-mainland addresses will be charged at cost.

Orders under £100

For non-priority orders under £100, paid by credit / debit card, the following charges apply:

Under 1kg 1st class post £4.95

Over 1kg Economy carrier £8.95

Special Terms

Items marked + in the catalogue will be made/purchased to order, and may take a little longer to despatch.

Items marked ~ will be despatched direct from the manufacturer, and may take a little longer to despatch.
