Irrigation

2022-23
Catalogue

The History of Access Irrigation

Access was started in 1958 by Mr Graham Pearce, an industrial chemist who had traded chemistry for the 'good life' running a small market garden in Crick, Northamptonshire. To try and get a better price for his strawberries, he designed an innovative glass and steel cold frame with sliding glass sides for easy access – hence our name Access.

Original drip nozzle

The sandy soil at Crick caused low strawberry yields and it was decided to concentrate instead on selling the cold frame. Before the invention of the polytunnel, cold frames were a low cost way of growing under glass. As nurseries and growers began to take up the cold frames with enthusiasm, attention was turned to providing irrigation inside the frames. Unhappy with the nozzles already available, Mr Pearce used his scientific background to design his own.

The invention of the polythene tunnel caused the company to refocus. Cold frames were then targeted at the keen gardener and the irrigation division was formed to supply growers with irrigation – still in its infancy in the UK.

From its horticultural roots, the irrigation division of Access focuses on 3 main areas: horticulture, landscape and more recently green systems including rainwater recycling and green roofs. All systems are designed to the same exacting standards of efficiency and durability as our horticultural irrigation systems.

In 2001 the company launched its highly respected components catalogue, coupling professional quality components with helpful tips and advice.

Green roof system

The Access philosophy, instilled by Mr Pearce in the 1960's, has always been to provide innovative products coupled with good customer service. From advice to supply, Access are able to offer a fast, friendly service backed up by our own specialist design function and dedicated warehouse.

We are here to help.

Welcome to our 2022-23 catalogue

Welcome to our latest catalogue, filled with professional quality irrigation components.

Order ONLINE

Our new website allows you to browse and purchase our entire product range quickly and easily. You can also download relevant PDF information sheets. Items with this logo have bulk pricing online.

FREE Economy Delivery

For not so urgent orders we can offer a FREE delivery service on orders over £125 in value*.

STANDARD Delivery

We deliver fast, as standard, using fully traceable carriers. For landscapers we can even deliver direct to the clients address, allowing work to start as soon as the goods arrive.

NEXT DAY Delivery

For really urgent orders, we also offer a next day service for items in stock. If necessary, items can be put on an AM delivery*.

COMPETITIVE Pricing

Access offer quality irrigation components at competitive prices, so you can always be sure of a good deal – and all backed up by our friendly and knowledgeable sales team!

We look forward to assisting you.

Liquid Feeding

A pressure regulator must be fitted to all systems capable of delivering above the rated pressure. For fertilisers Water Regulations require a double check valve (see p45) in domestic situations or a pump and tank set for commercial use to prevent back-contamination.

Static Dilutors

Don't leave partially used feed overnight.

Fill the Static Dilutor bottle with liquid feed, select the appropriate jet and connect to the water supply. As water passes through the dilutor head it draws up a ratio of liquid feed which mixes with the water. Designed to be filled, put near the tap, and then not moved until it is emptied. **Max operating pressure 2.5 bar.**

Capacity	Flow Rate		Connector Type	Jets Supplied	Code	Price £
	min	max				
9.0L 2 gal	0.3m ³ /h 60 gph	2.3m ³ /h 500 gph	Brass quick connector & 'Geka'	10:1	ADS (normal flow)	69.00
				25:1		
				50:1		
				100:1		

Mobile Dilutor

The Mobile Dilutor gives extra versatility. The liquid feed is kept inside an inner bag. This has a number of advantages, the unit need only be part filled, it can be moved from tap to tap without disturbing the final dilution rate and it can be left part-filled overnight.

A wider range of chemicals including those of a similar density to water can be used.

The bottle will withstand 4.0 bar pressure and is manufactured from heavy duty polythene.

Capacity: 6.5L/1.4 gal. 'Geka' type connections are supplied as standard.

Also supplied: straining wire,
wire strainer, suspension
straps and glue

**Remember,
these are
complete kits!**

The Access Mini-spin nozzle gives a very even level of distribution.

The bridge-less design has a rotating anvil which shatters the water into evenly spread particles. In comparison, the tiniest blemish or build up of lime on a fixed anvil nozzle gives permanently uneven distribution.

The nozzle fits at the end of a flexible dropper tube. In low tunnels the pipe lines can be above head height, yet allow the nozzle to remain at a height to ensure the best distribution pattern without "bounce back". Drip-stop valves are fitted to each nozzle. **Glue included.**

Glasshouses

Tunnels

All designs give high uniformity

When ordering - quote code and length required, e.g. KU3-10

Multi-span Houses Lines can be linked together to a header pipe, with valves or solenoid valves to each line. Contact our sales team.

Supplied with 2.5m lengths of pre-drilled and socketed uPVC pipe, Access Mini-spin nozzles, drip-stop valves, downtubes (tunnels only). Entry 'Geka' hose fitting. Twin lines (3.0m/4.2m/5.5m widths are single line) include linkage pipework and on/off valves to each line. **Fixings supplied:** Wire strainers, straining wire and suspension straps (single line in tunnel has suspension straps to fix to ridge)

For 'Geka' hose tails see p15; Blanking plugs or shut off valves to blank off nozzles see p38

CNL Drippers

These 'state-of-the-art' drippers are designed for crops such as Strawberries where extremely high uniformity is required. The pressure compensated drippers also have a non-leakage device which 'locks' the dripper at the end of the cycle, preventing water drainage at the end of the cycle and the need to refill at the start of the next cycle.

	HCNL	LCNL
Pressure Range:	1.4 - 4.0 bar	1.0 - 4.0 bar
Max head sustained	0.3 bar	0.15 bar
4 way manifold:	80cm black leads, 'S' stakes

Netafim PCJ CNL Drippers

- Labyrinth design with maximum filtration area
- Continuously self cleaning dripper
- Silicon injection moulded diaphragm

Drippers are available in two operating pressures, with the HCNL having a higher shut off pressure, making them better suited to sloping sites.

Available as dripper only, or with 50cm or 80cm lead and Prevo 'S' stake.

LCNL operating pressure: 0.7 - 4.0 bar

HCNL operating pressure: 1.5 - 4.0 bar

Punch pliers 25/32mm	DPPL3	19.00

Flexidrip Nozzles with Stake

Nozzle with stake. 2 l/h @ 1 bar.
Needs leads.

The Access Flexidrip nozzle is joined to its stake with a unique 4-way universal joint, providing a strong, snag-free unit.

Qty	Code	Price £
25	D2NSL-Q	13.00
100	D2NSL-H	50.00
500	D2NSL-5H	236.00

Dripper Leads

5.0mm x 80cm leads can be cut to provide shorter lengths.

Use DNIP adaptor to connect to lateral pipe.

Length	Qty	Code	Price £
80cm	25	DL80-Q	4.60
80cm	100	DL80-H	16.00
	25	DNIP-Q	3.70
	100	DNIP-H	12.00

Ottima PC360

Compensated dripper – ideal for larger pots

The Ottima PC360 is a pressure compensated dripper making it ideal for larger pots and planters where more water is required. The Ottima sprays over a wider diameter than a traditional dripper, reducing water run-through on hanging baskets.

Watered area approx. 0.25m diameter.

Flow: 30 l/h. Pressure: 1.5 - 3.0 bar.

Connect onto a 16mm or 20mm supply pipe using small bore pipe – use P13-20M – see p27.

Requires 3mm punch – see p4; for a barbed connector into 16mm or 20mm pipe use DNIP - see above.

Qty	Code	Price £
10	DOF30-T	8.80
100	DOF30-H	81.00

Tree Watering Dripper

- 8 l/h output for faster watering
- Simply punch dripper into 20mm pipe
- Pressure compensated

Netafim 8 l/h CNL dripper for precise, pressure compensated watering. Simply run a 20mm polythene pipe above the tree pots and punch in the dripper and fit the lead and anchorage stake.

Qty	Code	Price £
25	D8TD-Q	38.00
100	D8TD-H	147.00

Stock Bed Watering

This low cost watering system is ideal for watering large areas economically. Each stake set includes a riser pipe, fittings, sprinkler and straps to fit to the customers own stake (25mm square is ideal).

The medium kit will water an area up to 100m² (25m x 4m).

What you get:

- 10 risers 1.2m high
- Sprinklers (3 sets in medium kit)
- 50m of 20mm pipe
- Fittings for end or centre feed
- 'Geka' entry connector

For small bed kits
see p18.

T-tape for Glasshouses

Designed for row crops in tunnels each dripper is just 20cm apart. This low cost, thin wall system is ideal for flower crops and vegetable production.

Select the parts you need in 4 easy steps:

- 1 Buy one starter pack per system.
- 2 Buy one header pack per bed. Add up the width of all the beds – you will need this much 16mm header pipe.
- 3 Total up how many runs you will have – you will need one entry fitting per row
- 4 Multiply the number of rows you have by their length to give the total meterage of T-tape you need.

Output @ 0.55 bar	5 l/m/h	Line spacing	0.3–0.45m or one per row
Operating Pres.	0.3 – 0.7 bar	Capillary beds	0.6m
Maximum length on 0% slope:	50m		

Pipe Headers

- 1 **Starter pack**
Contains filter, pressure regulator and punch. Includes both 'geka' and snap connectors. Can be fitted to the outlet of a 1/2" tap (this has a 3/4" thread) or can be put in the hose line. Includes a budget hand pump.
- 2 **Header pack**
Contains fittings to create a centre fed header, with 'geka' and snap connectors (p17). Does not include header pipe – use 16mm pipe. This will allow up to 400m of T-Tape to be used per bed.

Entry Fittings

- 3 One entry fitting required per run. Requires 4mm hole to be punched into the side wall of the header pipe.

T-tape for Glasshouses

- 4 16mm T-tape with 20cm dripper spacing.

Mist Propagation

Mist propagation produces high success rates, even with difficult specimens. Also provide bottom heat – cool tops and warm bottoms produce the best results!

Mist Wean Controller

- Extremely Reliable Controller
- Wean function built-in
- Easy to programme

The controller features 3 easy to use dials. The 'valve on' dial allows the burst length to be set. The 'delay' dial can either be set to 'off', in which case the mist will burst every time the wet leaf dries out, or it can be set to a minimum delay to allow for weaning. Finally the 'sensitivity' dial adjusts the sensitivity of the wet leaf.

Complete with 2.5m wet leaf, mains plug and cable and solenoid cable.

Code	Price £
MAMWCL	218.00

Polyphosphate filter available for hard water areas (page 9)

For larger units, Heron panels with multiple wet leaf interfaces are available. Contact our Sales Department.

Overhead Kit - Single Bench

With Mist Controller, wet leaf, solenoid, wire, wire strainer, support straps, glue and fittings as shown. Bench not included.

Riser Kit - Single Bench

Twin Bench kits available

With Mist Controller, wet leaf, solenoid, glue and fittings as shown. Bench not included.

Polyphosphate Descaler

 DATA
SHEET
ONLINE

Limescale is a major problem in irrigation – especially in Mist Propagation units and drippers.

- Simple Cartridge based system
- Mounting bracket and spanner included
- Easy Installation

How it Works

In 'hard water' areas Calcium precipitates out of the water supply causing scale build up on pipe walls, dripper outlets and plant leaves. Traditionally Nitric acid dosing is used to sequester the calcium, requiring large quantities of acid.

The polyphosphate descaler uses small quantities of long chain polyphosphates (derived from phosphoric acid) to act as a 'crystal modifier'. By modifying the crystalline structure these compounds will not precipitate into scale and actually stay in solution. Over time already deposited mineral scale deposits will also dissolve.

	Connection	Code~	Price £
Polyphosphate Descaler	1" F	EFBP	114.00
Spare Polyphosphate cartridge		EFBP-C	50.00
5 micron sediment pre-filter	1" F	EFBS	106.00
Spare sediment cartridge		EFBS-C	42.00

Wet Leaf

Replacement wet leaf.
We recommend replacement every few years.

Access Solenoid Valves 24V AC

- Rating: 3.8W
- Pressure range: 0.5-10 bar
- 3/4" BSPM inlet/outlet

Anti drip insert				MAA	10.00

- Stainless steel jet and anvil
- Anti-drip option for upside-down use
- Glass filled nylon frame

This nozzle has a 1/2" BSPM thread. Ideal pressure 3.5 bar. For a low pressure option, use Mini-mist nozzles p10.

Sprinklers

The sprinkler nozzle is the most important part of your system, so we only use top quality nozzles. Unlike old fashioned nozzles, our modern sprinklers have been designed to provide optimum distribution, while keeping precipitation rates low to prevent crop and compost damage.

Half Circle

This nozzle uses the Eindor taper system, see p38. Ideal working pressure 2-3 bar.

Here is a "snap on" / "snap off" system. We use tough brass quick release connectors, much tougher than domestic plastic fittings - and are fully compatible. It is easy to connect together and there are no "horrid" hose clips! 

Landscape

Irrigation is vital if plants are to establish quickly, especially when conditions are warm and dry. Irrigation also ensures newly planted specimens have a far better chance of survival, and that plants and lawns in high traffic areas are able to recover. As well as the components and kits available in this section, Access produce a companion catalogue – the 'Landscape Pocket Guide' which includes sample irrigation designs for small to medium sized landscape projects. For larger projects, Access also have an experienced design department.

Border Watering Kit

Keep precious plants watered even in hot, dry spells with this border sprinkler kit.

The system consists of a black pipe running the length of the border, with spiked risers fitted as required.

Each riser has a choice of nozzle to suit the border width. Branching tees and elbows are included. Connect to an outdoor tap or a garden hose. Simple to install. Needs punch, see p4.

What you get:

- 10 sprinkler risers
- 50m pipe (20mm)
- Tap connector
- Fittings
- 10 large sprinklers
- 10 medium sprinklers
- 10 half-circle nozzles

Covers up to 75m²
(25m x 3m wide)

Code	Price £

Nozzle	KES040	KES070	KEASH40
Bed width	2.0m	3.0m	1.0m
Sprinkler Spacing	2.0m	2.5m	1.8m

Small Border Watering Kit

For smaller gardens this kit will water an entire border with water efficient sprinklers.

The system consists of a black pipe running the length of the border with spiked risers fitted every 2m.

Branching tees and elbows are included. Connect to an outdoor tap or garden hose. Simple to install. Needs punch, see p4.

What you get:

- 10 sprinkler risers
- 25m pipe (16mm)
- Tap connector
- Fittings
- Medium Sprinklers (KES040)

Covers up to 40m²
(20m x 2m wide)

Alternative nozzles are available on page 10.

Border Spray Watering Kit

- Gentle spray
- Simply installs at the front of the border
- Can be automated

Designed to water a border up to 3m deep from the front, the kit is ideal for more established borders. The system uses sprinklers on small metal spikes up to 3m apart. 16mm black polythene pipe runs along the front edge of the border.

The sprinkler nozzles provide a very fine spray, so delicate plants are not damaged.

Connects to a garden hose or a tap. Minimum pressure: 2.1 bar. Requires DB valve (p27) to comply with domestic water regulations.

Code	Price £
SBMP4	165.00

What you get:

- 25m pipe (16mm)
- Tap connector
- Fittings
- 4 sprinklers on metal spikes

Covers up to 30m²
(12.5m x 2.5m wide)

Popup Border Spray Kit

- Gentle spray on 300mm riser
- No pipework visible
- Can be automated

Designed to water a border up to 3m deep from the front, the system uses pop-up sprinklers that **rise 300mm out of the ground** when watering. A single trench along the front of the bed contains all of the pipe and the sprinklers, eliminating unsightly pipework on the bed.

The sprinkler nozzles provide a very fine spray, so delicate plants are not damaged.

Fits to a garden hose, a tap or an underground valve box (p23). Minimum pressure: 2.1 bar. Requires DB valve (p27) to comply with domestic water regulations.

Code	Price £
SBMP5	258.00

Covers up to 37m²
(15m x 2.5m wide)

What you get:

- 25m pipe (20mm)
- Tap connector
- Fittings
- 5 sprinklers on 12" pop-up bodies

Border Drip Kit

	Covers	Code	Price £
Small	15m ²	SPBK25	46.00
Large	60m ²	SPBK	135.00

Drip irrigation is the most efficient and unobtrusive way of watering beds, with water dripping directly into the soil. The drip line is brown to make it as unobtrusive as possible, although it can be covered with a mulch to make it invisible.

The Permadrrip drip line is made from a thick walled polythene pipe with commercial grade pressure compensated drippers spaced every 0.5m for even coverage. Simple to install.

The kit can either be connected directly to an outdoor tap, or can be connected to a hose with a standard quick connector. Requires DB valve (p27) to comply with domestic water regulations.

Hedge Drip Kit

- Speed up establishment for faster screening
- Reduces plant losses
- Can be automated

Using thick walled commercial grade dripline with drippers every 0.3m, this package is ideal for watering hedge lines to speed up establishment and reduce plant losses.

A single line of dripline is needed down each hedge run.

The kit can either be connected directly to an outdoor tap, or can be connected to a hose with a standard quick connector. Requires DB valve (p27) to comply with domestic water regulations.

Dripline Starter Pack

Allows dripline to be easily connected to an outside tap or to a hose using a snap connector. For beds supplied using underground pipe, the threaded fitting can be connected to a compression fitting. The kit also includes a stop end connector and a straight connector in case plain pipe (see p40) is being used to connect from the tap to the border

- Anti-siphon design resists clogging
- Brown to blend in
- Pressure compensated – ideal for long runs
- Thick walled for durability

Measure bed

Lay and peg

Connect up

Connect to tap

For Barbed Fittings
see p41

Your Questions Answered

How far apart do I space Permadrrip?

Space runs 0.6m apart. Use the 0.3m spacing Permadrrip for providing extra water around trees. Bending radius, 18cm.

How much do I need?

Work out the area of the beds (in m²) and double. This is how many metres of 0.5m spaced Permadrrip you need.

How much can I use?

It depends on your water supply. Measure your supply in l/hr (see p37). Divide this by 3.2 for 0.5m spacing (5.3 for 0.3m spacing) this is how many metres you can run at a time.

What about Water Regulations?

For house gardens you can run Permadrrip on the surface if you add a DB valve. See p27.

How long should I run it for?

Approximately 30 mins per day in dry weather or one hour three times a week.

Operating range: 0.8-3.5 bar
Nozzle Output: 1.6 l/h
Maximum length (0.5m): 165m
Recommended Filter: 0.13mm

Length	Spacing	Code	Price £
25m	0.15m	TNT0.15-Q	28.00

100m	0.50m	TNT0.5-H	83.00

0.5m spacing for borders

0.3m spacing for hedge runs

0.15m spacing for green roofs and tree pits

Small Temporary Lawn Kit

- Temporary system for smaller lawns
- Designed with professional sprinklers
- Easy to put out and take away

Using metal spiked risers for the lawn topped with professional quality sprinkler nozzles from Hunter and commercial grade 1/2" hose, this kit quickly and easily connects together to water the lawn, either during establishment or during hot, dry spells.

If the system is run for 4 hours at night it will gently put the equivalent of 1 weeks worth of rain down on the lawn – a timer will automate this.

Includes 3 risers with nozzles, 25m professional grade hose, quick connectors and tap fittings.

Code	Price £
SLMP3	174.00

What you get:

- 3 sprinklers
- 25m 1/2" hose
- Fittings
- Tap connector

Temporary Lawn Watering Kit

5 RISER
KIT AVAILABLE
ONLINE

Laid a new lawn?

Use this system to help it establish. Add an automatic controller for fully automatic operation.

Includes 3 risers, each with a sprinkler that covers 10m diameter, 25m of hose and all fittings required.

Code	Price £
STLW	288.00

**Covers up to 250m²
(25m x 10m wide)**

What you get:

- 3 risers and sprinklers
- 25m 3/4" hose
- Fittings
- Tap connector

Lawn Watering Kit

Nothing looks better than a well watered lawn, and this pop-up sprinkler kit makes installation very easy.

3 pop-ups are included, each one can have its radius adjusted between 4.9m and 9.1m, and its arc adjusted between 40° and 360°. 25m of pipe and all fittings are included, as is a tap connector.

Note: Water Regulations require pop-up sprinklers in commercial premises to be protected by a break tank. For home gardens, check with your water supplier.

OTHER

SLW3	107.00

**Covers up to 250m²
(25m x 10m wide)**

What you get:

- 25m pipe (20mm)
- Tap connector
- Fittings
- 3 pop-up sprinklers with interchangeable nozzles

Underground Valve Boxes

For a neater installation, hide all of the control valves underground.

For warning label see page 44.

	Battery	Price £	Mains	Price £
2 zone	EPAV02	154.00	EPAB02	120.00
4 zone	EPAV04	245.00	EPAB04	174.00
DB option	EPAVDB	218.00	EPABDB	182.00

3 Simple Steps

1 Select Valve Chambers

Choose one or more valve boxes to bring water to the various areas of the garden. If you are having a battery powered controller, choose a battery valve box.

2 Choose Controller

Choose mains or battery powered controller to suit your needs.

3 Select Cable

If the controller is remote from the valve box, measure how much cable is needed to run from the controller location to the valve boxes.

Controller not included - see pages 28-29

Tap Link Kit for Valve Boxes

The kit consists of a 2-way brass manifold that screws onto the outdoor tap – allowing the tap to still be used for filling a watering can or connecting a hose. On the other outlet of the manifold 25m of underground pipe runs from the tap position to the valve box.

Tap and backplate are not included.

Pipe Size	Code	Price £
20mm x 25m	STK20	73.00

Border Link Kit

The Border Link Kit allows up to 4 separate beds to linked back to either a valve box or an outside tap using underground pipe. The kit can supply water to either border drip kits or border sprinkler kits. By linking the beds together underground the irrigation system becomes much less obtrusive and is easier to automate.

The kit consists of 25m of underground supply pipe, 4 take off points (one for each bed) and connections for either a standard garden tap or to an underground valve box.

Code	Price £
SLK4	64.00

Tap Manifold

A simple way of fitting manifolds to the tap, kits will suit battery operated controllers or mains powered controllers. Includes valves and link pipe but not tap or controller. DB valve option provides compliance with the Water Regulations for dripline in house gardens.

Inlet: 3/4" F

Outlet: 3/4" M or 1" F

Controller not included - see pages 28-29

Controller Type	Zones	Code	Price £
Battery	2 zone	EPAG02	117.00
	4 zone	EPAG04	196.00
	DB Valve	EPAGDB	157.00
Mains	2 zone	EPAT02	87.00
	4 zone	EPAT04	136.00
	DB Valve	EPATDB	142.00

Rotator Sprinklers

- Matched Precipitation
- NEW side strip
- Water efficient

1/2" BSPF thread

Water efficient sprinklers with 'matched precipitation' which allows different nozzles and arcs to be used on the same zone while maintaining uniformity. If there is sufficient flow and pressure, in 'home gardens' the sprinklers can be connected using a 'DB' valve (page 27).

The new 'Pro' body has a heavy duty spring, a check valve and 5 year warranty. The sprinkler is regulated to 2.8 bar pressure.

Hanging Basket System

Ever wanted to water a garden, but thought it was too complicated?

Access have designed a new range of kits which include all the parts you need to set up the system. Automatic controllers can be added to irrigate whilst on holiday, and several systems can easily be run from a standard 1/2" tap.

Easy Installation

Fit to tap

Clip to wall

Cut to length

Insert dripper

Fit lead and stake

Turn on

The ideal way to water baskets and tubs

- Easy to install
- Unobtrusive pipework
- Top quality nozzles for reliability
- Can be automatic

Hanging baskets and planters enhance any property, but are a nightmare to water. Now, with this easy to install system, everything can be watered with the turn of a tap.

The Access dripper kit uses a pressure compensating nozzle ensuring that the output is the same whether the drippers are at eaves or ground level. It also allows 6mm piping to be used. This is only pencil thick and is black for long life. Pipe clips with masonry nails are supplied to fix to brick or timber.

An adaptor enables the system to be connected to the outlet of your tap. For completely automatic watering see p28.

Dripper

Stake

What you get:

Small	Large	
10	25	Drippers
10	25	Stakes
25	100	Pipe clips
1	3	Branching tees

DB Valve and Kit

Water regulations require a DB valve to be fitted 300mm above the highest dripper. The fixing kit gives the parts required to fit the valve into the small bore pipe at high level.

Inlet: ¾"F Outlet: ¾"M

	Code	Price £
DB Valve	EVDB3	114.00
Fixing Kit	EVDB3KT	3.80

The fixing kit includes: fixing bracket, small bore pipe connectors.

Hanging Basket Feeder

Feeding baskets has always been a problem, especially as the small compost volumes of a basket and the regular watering required conspire to rob the plants of the nutrients they need.

The feeder is connected to the irrigation pipework. Inside is a slow release fertiliser which feeds every time you water. Two cartridges should last a season and the first cartridge should be replaced after 2 months.

Flow range:	1 – 200 l/h
Max pressure:	4.0 bar (58 psi)
Fittings supplied:	Connector for 3.5-4.0 mm ID pipe Brass quick connectors

	Code	Price £
Hanging Basket Feeder	AFBP	62.00
Replacement Cartridge	AFBP-C	19.00

Brass quick connector

Small bore connector

Control Systems

Battery Controllers

Battery operated controllers are becoming increasingly sophisticated and reliable, and allow automatic control anywhere – making them ideal for remote locations. We carefully select controllers, ensuring they will endure the damp – vital in Britain! Batteries will last a whole season. **Always protect controllers from frost.**

Galconette – Single Station

A simple, reliable tap timer with large display and plenty of features.
Manual over-ride with auto off function.

	Code	Price £
Galconette	EPAGT	59.00
Battery (1 needed)	C280-9V	1.90

Single Valve Bluetooth Controller

No more fiddling about at the tap to programme the controller, the Galcon app allows remote programming from up to 10m away. If it is raining, the app allows easy access to the rain off' function.

	Code	Price £
Galconette BT	EPAGBT	65.00
Battery (1 needed)	C280-9V	1.90

• Button operation	• Rain off button
• Screws directly on to an outdoor tap (¾" F x ¾" M)	
✓ 4 starts per day	✗ Cycling option
✓ 1min - 12hr watering time	✓ 1 year battery life (average)
✗ Seasonal adjust	✗ Rain sensor option

• Button or App programming	• Rain off via button or App
• Screws directly on to an outdoor tap (¾" F x ¾" M)	
✓ 4 starts per day	✗ Cycling option
✓ 1min - 12hr watering time	✓ 1 year battery life (average)
✗ Seasonal adjust	✗ Rain sensor option

Galcon – 1 and 4 Station

Controller can either be mounted on a valve or wall mounted (bracket included). Manual over-ride.

	Code	Price £
Single station with 1" valve	EPAG01	124.00
4 station controller only	EPAGDC4	111.00
1" valve for 4 station (fit up to 4)	EPAGV	35.00
Battery (1 needed)	C280-9V	1.90
Rain sensor	ERS	42.00

• Rain off button	• For outdoor use
• Each station can be programmed independently	
✓ 4 starts per day	✗ Cycling option
✓ 1min - 12hr watering time	✓ 1 year battery life (average)
✓ Seasonal adjust	✓ Rain sensor option

Hunter Pro Tap Timers

This rugged timer is controlled via a Bluetooth app on your Smartphone. Push-button manual start to allow up to 1 hour of watering. Two irrigations modes with two start times each.

One or two outlet options. 2 year warranty.

Pressure: 0.5-8 bar

	Code	Price £
Single outlet	EPART01	80.00
Twin outlet	EPART02	124.00

• App programming with manual button	• Rain delay up to 7 days via app
• Screws directly on to an outdoor tap (¾" F x ¾" M)	
✓ 4 starts per day	✓ Cycling option
✓ 1sec - 24hr watering time	✓ 2 x 1.5v AA batteries included
✗ Seasonal adjust	✗ Rain sensor option

Hunter X2 Controller

Easy-to-configure control panel for up to 14 zones, including 3 programs and 4 start times each. Plug in the revolutionary WAND module to allow remote management and advanced water-saving features using the Hydrawise software. Hydrawise maximises water savings by automatically adjusting irrigation schedules based on the local weather. It also compatible with Amazon Alexa™ and Control4® home automation. 2 year warranty.

WAND module

• Easy to use dial	• Lockable outdoor controller
• Rain off setting on dial	• Optional WAND with Hydrawise software
✓ 12 starts per day	✗ Cycling option
✓ 1min – 12hr watering time	✓ Non volatile memory
✓ Seasonal adjust	✓ Rain sensor option

1" BSPF	EPAGV	35.00

Accu-Sync for Hunter

- Adjustable pressure regulation (1.5 – 7 bar)
- Works with Hunter PGV valves
- Max pressure rating: 10 bar

	Code	Price £
Accu-sync	ESVHAS	49.00

Low Voltage Cable

Heavy duty 0.8mm cable for wiring solenoids. 1 core needs to be used for the 'common return', so a 4 core cable will wire 3 solenoids etc.

	10m	Price £	100m	Price £
4 Core Cable	ELCS04-T	24.00	ELCS04-H	108.00
6 Core Cable	ELCS06-T	29.00	ELCS06-H	164.00
12 Core Cable	ELCS12-T	64.00	ELCS12-H	340.00

Connectors

Easy to use - no wire stripping needed.

	Qty	Code	Price £
Grease filled connectors for joining cable to Solenoid valves	10	ELCG-T	11.00
	50	ELCG-L	48.00

Cable & Crimps

2.5mm Hunter approved 2 core decoder cable.

Grease connector allows easy connection of cables with grease pot to prevent corrosion.

	Code ~	Price £
2 core decoder cable 250m	ELCS2D-25H	523.00
2 core decoder cable 500m	ELCS2D-5H	874.00
Grease connector	ELCGD	3.30

Floating Level Switch

3 wire design allows circuit to open or close on contact.

Suitable for high or low water applications.

Lead	Code	Price £
3m	EWTFLO3	53.00
10m	EWTFLO10	77.00

Floating level switches stop pump damage if you run out of water.

Pressure Vessels & Switches

6 bar pressure switch

5 way kit

5 Way Kit consists of:

- 1" 5 way tee
- 1" non-return valve
- 1" brass nipple
- 10 bar pressure gauge

Genyo Auto-start Unit

Converts pumps so that they start automatically when a pressure drop is detected, such as when a tap is opened or an irrigation valve operates.

- IP65 rated body
- 1" BSPM inlet and outlet
- Operates pumps up to 16 amps
- Max 10 bar pressure
- Pressure Gauge included

Pressure Losses	
Loss (m)	Flow m³/hr
2	3.4
5	5.2
10	7.5

	Code	Price £
Genyo	EPUPSTF	289.00
Union	FPTU4-4F	22.00

Union fitting

Allows the Genyo unit to always face forward and to be removed from the pump without unwiring the entire unit.

Vertical Pumps

These vertical pumps are ideal for larger flows. For more 'mission critical' applications we also sell the Lowara range of pumps which boast a network of service engineers for fast breakdown assistance.

River and Lake Pump Package

Professional pump system

Designed for easy pumping from wells and rivers the package includes a DAB1200X auto-start submersible pump, suspension kit, disc filter and 25m of pipe. Will handle moderately sediment loads. For dirtier water upgrade a floating inlet and to a semi-automatic filter (p36).

For fully automated irrigation using river water, pair up with a valve box (p23) and controller.

What you get

- DAB 1200X auto-start pump
- Isolator switch
- Stainless steel suspension chain
- 1" Disc filter and shutoff valve
- 25m of 25mm MDPE pipe

Code	Price £

Auto-start Submersible

DAB1200X

Auto-start copes with 'water-out' situations

Designed to cope with 'water out' situations, the pump will automatically stop if the water supply runs out, then periodically try to restart until the water supply returns. Built-in non-return valve. DAB1200X requires buffer vessel to protect the pump. DAB55X is a variable speed pump so will cope with high and low water flows.

+ see p52

Designed to boost the pressure of the water supply

- Complies with the Water Regulations
- Simple to Install

These units are designed for systems where pressure is a problem or compliance with the Water Regulations is required. The units are pre-assembled and simply need to be connected to a power and mains water supply.

Pre-assembled Pump Unit

Designed for easy pump installation the pump is supplied mounted on a plate and pre-wired with a Genyo auto-start unit and to an isolator switch.

The auto-start unit brings the pump on as soon as a drop in pressure is detected.

Includes 1m of suction hose with 1" BSPM fittings to connect to an irrigation tank outlet.

Suitable for Lowara horizontal pumps – **pump NOT included.**

Code +	Price £
EPPKHA	648.00

Compact Pressure Booster Units

Designed for lower flows where compliance with the Water Regulations is required. The flow from the unit must be less than or equal to the flow into the tank.

650mm diameter x 1100mm high

Inlet: 3/4" BSPM Outlet: 1" F

Head	Flow (m³/hr)
20m	4.2
30m	3.0

~ see p52

Pump Relay

This reliable pump relay box provides a simple interface between pump and 24v AC signal from the controller. No low water over-ride. Lockable enclosure.

FLC Amps	Code	Price £
12	ESB1PH	149.00

Transformer Box

240v - 24v transformer. 1 input 1 output mounted in IP65 box. Ideal for operating solenoid valve via float switch for mains fill.

Amps	Code +	Price £
3	ESB1TB	161.00

Pump Starters

Pump Starter

Isolator Switch

Pump Starters allow panels or pressure switches to operate the pump. All Starters include the option of a low water over-ride to protect the pump.

	FLC Amps	Code +	Price £
1PH Heavy Duty Starter	16	ESB1HD	386.00
3PH Heavy Duty Starter	16	ESB3HD	411.00
1PH Isolator Switch (no starter)	25	ESBI	40.00

Heavy Duty Starters include a thermal overload for enhanced pump protection. Specify pump Full Load Current (FLC) when ordering heavy duty starters so that the correct thermal overload can be fitted.

Mains Fill System

Top up rainwater storage tanks with mains water in Summer. Adjustable sensor allows for minimal re-filling, providing plenty of space for rainwater.

	Code +	Price £
Above	EWTFB-BK	392.00
Below	EWTFB-BK	581.00

Above ground tanks

240v transformer, float switch and 1" solenoid to fit into mains supply pipe to tank ball valve.

Below ground tanks

240v transformer and 2 float switches (one for alarm), air gap compliance kit, overflow alarm & 1" solenoid valve to connect to mains water supply.

Pre-assembled Tanks with Air Gap

NEW

Includes air gap to comply with water regulations, inlet ball valve, overflow, tank outlet with gate valve.

Inlet: 3/4" BSPM

Outlet: 1" BSPF

Capacity	Ø x H mm	Code +	Price £
200 L	650 Ø x 780	EPTS0200-TANK	308.00

Introduction

We only choose good quality fittings to put in our catalogue – we are often surprised at the poor quality parts that are around.

To make life less complicated we tend to stock all the popular sizes – if you have a large requirement for something unusual please give us a call.

Stuck without a ruler? Use a coin!

5p = 17mm diameter	10p = 24mm diameter
2p = 26mm diameter	£1 = 22mm diameter

Identification Tables

Thread Sizes

The O.D. of the thread and its size are different. For example a ½" thread has an O.D. of approx ¾".

BSP Thread	¼"	⅜"	½"	¾"	1"	1¼"	1½"	2"
Male thread OD mm	13	17	21	26.5	33.6	42	48	60
Female thread ID mm	11.5	15	18.6	24	30	38.5	45	57

Imperial Pipe

Like thread sizes, the O.D. and the pipe size are different. Wall thicknesses are denoted by its class. Black polythene pipe was generally class B, C or D. Rigid grey uPVC pipe was class C, D, E or T. We can supply adaptor fittings - please ask our sales department.

Pipe Size	⅜"	½"	¾"	1"	1¼"	1½"	2"
OD mm	17.2	21.4	26.5	33.6	42.2	48.3	60.3

Metric Pipe

The pipe is measured by the O.D. Below 12mm diameter there are no standard sizes - so beware when matching small bore pipe.

Pipe OD mm	12	16	20	25	32	40	50	63
Blue MDPE water pipe (12 bar)			✓	✓	✓		✓	✓
Black MDPE water pipe (10/12 bar)			✓	✓	✓	✓	✓	✓
Black LD/MDPE pipe (4/6 bar)	✓	✓	✓	✓	✓	✓	✓	✓
Grey uPVC pipe (5-16 bar)		✓	✓	✓	✓	✓	✓	✓

Copper Pipe

Available in O.D. sizes 15, 22, 28, 35, 42 mm.

If you can't easily work out the OD of a pipe, wrap a strip of paper round and mark where it overlaps. This will then give circumference of pipe. Divide by pi (3.1428) to give pipe diameter.

Want to know your water flow?

Take a container of a known volume (e.g. 10l) and time how many seconds it takes to fill with the tap 3/4 open (e.g. 20 seconds). Divide the volume by the time then multiply by 3600. e.g. $\frac{10}{20} \text{ (bucket size)} \times 3600 = 1,800 \text{ l/h}$

Eindor Taper Fittings

We have been using these fittings for many years — the push fit design has been tested to 6 bar!

Pre-packed in resealable, labelled bags. Easy to open, easy to identify.
We try to be helpful!

12mm Connector

For 12mm OD poly. Bottom end fits 6mm F fittings eg KEP.

Qty	Code	Price £
25	KECL-Q	3.70

Polythene pipe has a number of advantages over uPVC pipe (p46). It is less susceptible to frost damage, does not need solvents to join it and is more resistant to stone damage underground.

Choose pipe with a lower pressure rating for above ground work as it is more flexible. Choose 10 bar rated pipe for underground use where it is more difficult to spot leaks. 

Underground Supply Pipe

- 10 bar black MDPE pipe
- Thick wall for durability
- High pressure rating
- Use compression fittings

Blue water pipe must only be used for potable underground mains water supplies, such as cold water feeds to storage tanks.

It must not be used for irrigation water.

Black pipe with a green stripe is available for recycled water systems.

Installer Approved!
Not only are these fittings WRC approved - our installers think they are the best thing around - and they have tried them all!

PoziLock Fittings

- Positive sealing
- Increased pressure resistance

Barbed fittings are a low cost way of connecting low pressure polythene pipe. However, their design means that, occasionally, they may drip. This does not matter on a border but, when clipped to a wall, it can look unsightly.

Jubilee clips add a mess and can damage the fitting – making the situation even worse – and high pressure compression fittings are very bulky.

Access have introduced a neat and economical solution – a low pressure compression fitting. With a slim design, these fittings fit into the pipe quickly and neatly and can be easily remade if necessary.

Much easier to fit than barbed fittings – no need for hot water.

Sports

Irrigation is vital if surfaces are to be kept green and playable. As well as a wide range of sprinklers and controllers, we can advise on water storage, pumps and supply pipework. These pages contain a sample of the products we offer – a wider range of products, and full data sheets are available online.

Bowling Green Package

NEW

Fully automated watering for a top quality surface

For the best results with the minimum of effort an automated popup sprinkler system can be installed. This package includes 4 popup sprinklers, each one located half way down the side of the green, pipework that is located in the roll off gutter and a pump, tank and automatic controller. A rain sensor is also included to reduce watering costs.

A full specification and layout plan is available on our website.

What you get

- 5,000 litre irrigation storage tank with mains water connection and Water Regulation compliance kit
- Multi-stage stainless steel pump with autostart, pre-assembled and tested
- Irrigation controller with rain sensor
- Pipework from pump to green with necessary fittings
- 4 Popup sprinklers

Area	Code ~	Price £
40m x 30m	SB1G32-43	5794.00
40m x 40m	SB1G32-5K	6219.00

Manège Package

NEW

Automated dust suppression

Large sprinklers are located around the perimeter fencing, throwing water into the manège. Includes pipework and a pump and storage tank. An automatic controller will bring the irrigation system on early in the morning to water the manège, keeping dust levels down. A full specification and layout plan is available on our website.

What you get

- Large tank to comply with the Water Regulations
- Single phase pump unit to provide the appropriate pressure
- Pipework and valve boxes for perimeter watering
- Automatic controller with the option of wi-fi connectivity

Area	Code ~	Price £
20m x 40m	SMP24	4439.00
20m x 60m	SMP26	5739.00
30m x 60m	SMP36	6079.00

~ see p52

Rain King Travelling Sprinkler

NEW

Ideal for keeping pitches watered during dry weather, watering half of the pitch at a time.

The travelling sprinkler is placed at one end of the pitch and the steel wire run out to the other end of the pitch. Once operating the sprinkler slowly travels down the length of the pitch, shutting off once it has reached the other end. Watering can be done at night to minimise evaporation. One half of the pitch is watered each time, so an entire pitch can be watered over two nights.

Flow: 3,000 - 4,100 l/h.

Diameter: 34 - 38m @ 3 - 7 bar

Pumped supply normally required.

135m steel cable allows 183m long watering run.

3/4" BSPF inlet fitting - use 1" hose to minimise pressure losses.

Code ~	Price £
EHTS4	1255.00

Travelling Sprinkler Package

NEW

Provides pressure and flow for watering pitch

Travelling sprinklers normally require a pumped system to provide sufficient pressure and flow due to the large amounts of water required to water a pitch.

A large water storage tank fills when the system is not operating, allowing the pump to irrigate half of the pitch overnight. The process is then repeated the next night on the other half.

Includes 50m of underground pipe to run from the pump to the valve box at the end of the pitch.

A full specification and layout plan is available on our website.

Code ~	Price £
EHTS4-IP	8799.00

What you get

- Travelling sprinkler
- 100m hose and heavy duty trolley
- Hydrant box and 50m underground pipe
- Single phase auto-start pump
- 20,800 litre tank with air gap

Sports Pitch Strip Sprinkler Package

DATA
SHEET
ONLINE

A low cost method of watering a complete football or Rugby pitch in 10 days using a standard water supply.

Two options are available, for grounds where the pressure and flow are good the system can be run directly from the mains water supply; for faster watering or for poorer supplies a pumped system is available.

The package consists of temporary sprinklers run across the width of the pitch.

The pumped system also includes an underground pipe to run down one side line with 5 take-off points.

	Code ~	Price £
Mains	STPW6	2754.00
Pumped	STPW-P	5504.00

What you get (mains)

- 6 sprinkler sleds to cover pitch width
- Connecting hose and 2 hose reel carriers
- 2-zone battery controller to water 3 sprinklers at a time

What you get (pumped)

- 7 sprinkler sleds to cover pitch width
- Connecting hose and hose reel carrier
- 5 take-off points and 150m underground pipe

Reel Irrigators

DATA
SHEET
ONLINE

Reel irrigators are designed to water large grass surfaces such as playing fields or football or rugby pitches. Units will require a water storage tank and pump to provide enough pressure. Reel irrigators incorporate a drum of hose which is unwound manually. Once the irrigator is operating, the hose will automatically be pulled along the grass until it returns to the unit.

Speedy Rain 32/90

Hose diameter x length: 32mm x 90m

Output range: 1.68 – 3.60 m³/hr

Connection pressure: 3.5 – 5.0 bar

Wetted width: 26 – 37m

Rewind speed: 10 – 30 meters / hour

Code ~	Price £
EHR132	3247.00

Speedy Rain 40/130

Hose diameter x length: 40mm x 130m

Output range: 2.94 – 7.44 m³/hr

Connection pressure: 4.4 – 8.0 bar

Wetted width: 26 – 44m

Rewind speed: 10 – 40 meters / hour

Code ~	Price £
EHR140	6082.00

Order Information

Terms and Conditions

These Terms of Business are in addition to our Terms and Conditions of Sale. All orders placed with Access are subject to our Terms and Conditions of Sale unless agreed in writing by a director of Access Irrigation Ltd. A full copy of the Terms and Conditions of Sale is available on request.

Placing your Order

Please indicate the quantities, reference code and description on all orders. Please also include a contact phone number.

Phone: 01788 823811

We are open Monday - Friday 8.30am - 5.00pm or leave a message outside office hours.

Email: sales@access-irrigation.co.uk

A convenient way to order, 24 hours a day.

Online: www.access-irrigation.co.uk

All components are listed online for fast and easy ordering.

Collection

For a speedy service, phone your order through beforehand.

Payment Terms

New Customers

We require payment with order.

Existing Customers

Existing customers may open a credit account - details are available on request.

We accept payment by

Cheque, or the following credit and debit cards.

Damaged Goods

Any goods delivered damaged must be signed for as damaged and notified to us in writing, within 5 days; otherwise no claims can be accepted.

E&OE: Access reserve the right to change products and prices at any time.
No part of this Catalogue may be reproduced by any method without prior permission from Access Irrigation Ltd.

FREE Economy Delivery

Catalogue orders over £125 (ex VAT) will be despatched by post or carrier free of charge if paid by credit / debit card.

This service will normally take 3 – 5 working days longer than the Standard service. The order will generally be held until all items are ready for despatch.

Direct despatch (~) items and bulky/high value items are excluded.

STANDARD Delivery

Our standard service ensures that orders are normally despatched within 48 hours (over 85% are despatched in 24 hours). Items are despatched using fully traceable 24hr carriers.

Delivery charges for orders paid for by credit/debit card:

£0 - £250 **£12.95**

£250 + **£19.95**

For a faster service, orders will be part despatched if any items are out of stock.

Direct despatch (~), special order (+), heavy and bulky items may take longer and may attract a surcharge.

NEXT DAY Delivery

For really urgent orders, we can arrange for a next day delivery service for items in stock. Please ring through your order to check the stock situation. A delivery surcharge will apply.

Other Terms

Deliveries to remote areas (eg. Scottish highlands), Northern Ireland, Eire and non-mainland addresses will be charged at cost.

Orders under £125

For non-priority orders under £125, paid by credit / debit card, the following charges apply:

Under 1kg	1st class post	£4.95
Over 1kg	Economy carrier	£9.95

Special Terms

Items marked + in the catalogue will be made/purchased to order, and may take a little longer to despatch.

Items marked ~ are purchased to order so orders with these items may take a little longer to despatch.
