Description		Technical Specifications											
<p>An ACCESS automatic sprinkler system will ensure your playing surface is kept in top condition. Establishment of new greens will be more rapid and existing turf will be kept green and playable, even in long dry spells.</p> <p>The system uses four high-output sprinklers discreetly installed at the edges of the green. When activated, these will pop up in turn to distribute water evenly across the green. After watering, the sprinklers retract into their housings, so are resistant to vandalism. The sprinklers are automatically controlled to operate at night, so there is no playing time lost.</p>		<table border="1"> <tr> <td>Sprinklers</td> <td>Rainbird 950/Toro DT 35/55 pop up with integral 24V control valve</td> </tr> <tr> <td>Controller</td> <td>Hunter X-Core with rain sensor to give reduction in water application at pre-set rainfall level and manual override</td> </tr> <tr> <td>Water Tank</td> <td>Above ground 5000 litre black plastic tank with backflow prevention via Type AB air gap 1.9m diameter x 2.19m high</td> </tr> <tr> <td>Pump</td> <td>Multistage stainless steel pump, single or three phase</td> </tr> <tr> <td>Distribution Pipe</td> <td>Black 10 bar MDPE</td> </tr> </table>		Sprinklers	Rainbird 950/Toro DT 35/55 pop up with integral 24V control valve	Controller	Hunter X-Core with rain sensor to give reduction in water application at pre-set rainfall level and manual override	Water Tank	Above ground 5000 litre black plastic tank with backflow prevention via Type AB air gap 1.9m diameter x 2.19m high	Pump	Multistage stainless steel pump, single or three phase	Distribution Pipe	Black 10 bar MDPE
Sprinklers	Rainbird 950/Toro DT 35/55 pop up with integral 24V control valve												
Controller	Hunter X-Core with rain sensor to give reduction in water application at pre-set rainfall level and manual override												
Water Tank	Above ground 5000 litre black plastic tank with backflow prevention via Type AB air gap 1.9m diameter x 2.19m high												
Pump	Multistage stainless steel pump, single or three phase												
Distribution Pipe	Black 10 bar MDPE
