 www.access-irrigation.co.uk

For residential projects, it is normally possible to provide an irrigation design and cost without the need for a visit. Simply complete the questionnaire and draw up a plan of the garden (or let us have a garden designers plan) and we can do the rest.

Our Garden Irrigation Systems include a Pump and Tank unit for Water Regulations compliance and start at around £4,000 + VAT for supply only.

Alternatively, we offer a range of DIY kits for watering lawns and borders with a range of battery controllers for automated watering.

FLOW READING	Tap 3/4 Open	Bucket size (litres)		Tap 1/4 Open		
		Fill time (seconds)			Fill time (seconds)	

Simply time how long your tap takes to fill a bucket of water to give us a flow reading.

**What is your water source?**

Standard outdoor tap     
  Mains pipe     
 Pipe diameter: \_\_\_\_ mm

**Additional information:**

---

---

---

**Create a plan of your irrigation requirements**

- Fill in the form as accurately as you can (if you are not sure of the answer, note this on the form).
- Draw a simple plan of your garden on the grid sheet. Make it as accurate as you can. Mark those areas that require watering. (Scale if you can or put measurements on drawing).
- Clearly indicate on the plan the location of the water supply and pump and tank location - mains power will need to be brought to here
- Email or post the sheets to us.
